Familiar: Node JS, Express JS.

Languages

Bengali (Native)
English (Comfortable)

My Projects

TM Tool (Team project)

A simple website for managing teamwork.

Live Site || **Client-Side** || **Server-side**

● HTML, CSS, JavaScript, React JS, Tailwind CSS, Daisy UI, Firebase Authentication, Redux, React Data-Table, etc are used to build the site.

● One can register as an admin and will create the members' profiles for his teammates. He can create multiple teams, assign tasks to the members, and make opinions about his team members.

● The member will sign in with the user ID and password provided by the admin. He will either update the task or forward it to the admin.

● After every interaction, the admin or member will get a notification.

Cure Tools

This website is for a manufacturing company that provides medical tools for dentists.

Live site || **Client-side** || **Server-side**

● The website was built using HTML, CSS, Daisy UI, React, Firebase, and Node JS.

● The site is accessible to both admins and users. Admins can't get into the users' accounts and the users can't enter the admins' accounts.

● The admin will see features like 'Add an item', 'My items', 'Orders (submitted by the users)', 'My profile', 'Manage orders', etc.

● The user can see the 'My orders', 'My profile', 'Add a review' pages, etc.

● There are more features like payment, shipment, etc., based on the visitor's role.
